

HILLCO AIR FLOW SYSTEMS

FOR CASE-IH FLAGSHIP COMBINES

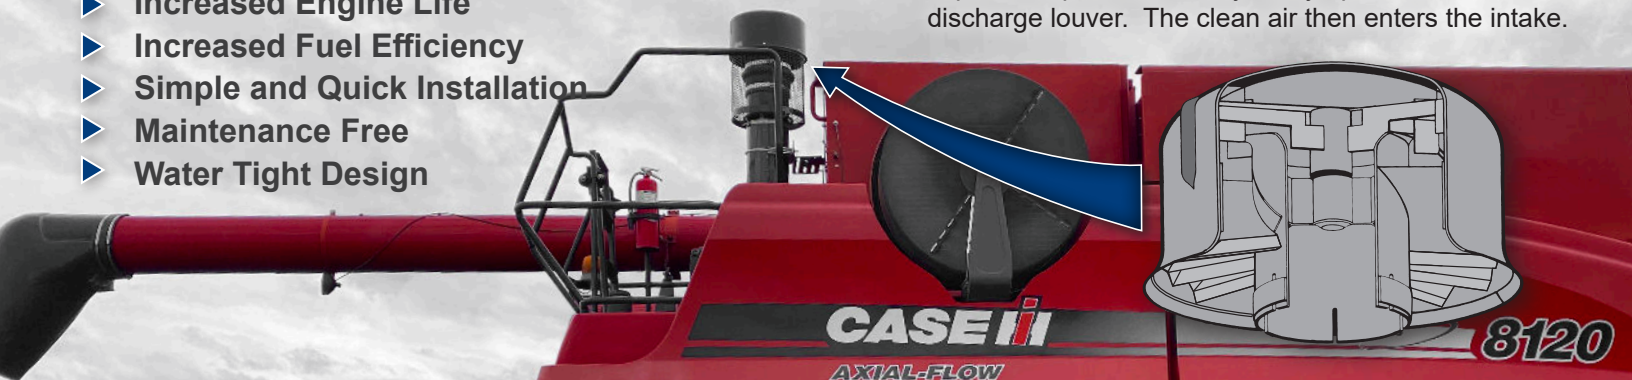

Hillco Air Flow Systems will extend the life of your combine's air filter in dusty and dirty conditions. The self-cleaning design requires no maintenance and will reduce the amount of dirt entering your tractor's air filter. Contact Hillco or your local Case-IH dealer for more information.

Benefits of a Hillco Air Flow System

- ▶ Extended Air Filter Life
- ▶ Reduced Downtime
- ▶ Increased Engine Life
- ▶ Increased Fuel Efficiency
- ▶ Simple and Quick Installation
- ▶ Maintenance Free
- ▶ Water Tight Design

The engine draws air causing the impeller in the pre-cleaner to spin. The centrifugal force of the spinning impeller expels the heavy "dirty" particles out of the discharge louver. The clean air then enters the intake.

Flagship High Mount	*7120, *8120, 9120, 7230, 8230, 9230, 7240, 8240, & 9240			X	
Flagship High Mount w/ Corn Screen	*7120, *8120, 9120, 7230, 8230, 9230, 7240, 8240, & 9240				X

HOW TO DETERMINE IF YOU NEED A LOW OR HIGH MOUNT KIT

*Some 7120 & 8120 combines have been updated so they draw air from the top of the radiator instead of the bottom.

Kits CLM7010 and CLM7510 fit combines that draw air from the bottom of the radiator.

Kits CLM9010 and CLM9510 fit combines that draw air from the top of the radiator.

Hillco recommends the use of the corn screen if the combine will be harvesting corn. The screen prevents leaves from being sucked into the precleaner.
